# **SITUATION SUMMARY**

## **2017 Statewide Winter Storms**

### **Cal OES Coastal Region**

#### **Paul's Slide, State Route 1, Monterey County**

Per Cal OES Coastal Duty Officer (CDO), as of 1300 hours on 05/25/17, Paul's Slide on State Route 1 has been closed to all traffic.

- Caltrans engineers report slide activity and the area has been closed in the interest of public safety.
- Assessment will commence and further details will be provided once released.
- All deliveries and local access previously scheduled have been suspended.

#### **Mud Creek Slide, State Route 1, Monterey County**

The Mud Creek area on State Route 1 sustained a major slide on the evening of 05/20/17, when over a million tons of rock and dirt fell down the slope continuing down to the ocean floor 250 feet off the shoreline.

- The Mud Creek area is ¼ mile in length, made up of five slides, four of which fell during this single incident and consolidated into one slide. The remaining slide now extends 1,500 feet in length over State Route 1 and is about 35 to 40 feet deep.
- Roadwork at Mud Creek was suspended and heavy equipment removed last week due to the threat of new slides and for safety of highway workers. Caltrans geologists and engineers plan to assess it further when this area stabilizes.
- There is no estimate when this section of State Route 1, approximately nine miles north of the San Luis Obispo/Monterey County line will re-open.

#### **Pfeiffer Bridge Incident, Monterey County**

California Highway Patrol (CHP) and Caltrans had a hard closure on the Pfeiffer Bridge on HWY 1 at mile marker 45.52 (SB Sycamore Canyon and the Bridge) due to a crack in the bridge. The bridge has been demolished so the road is closed and estimates for some access from the north is late September 2017.

- Backup air medical transport plans have been developed for medical emergencies through Cal OES Law Enforcement Branch.
- All businesses north of the Pfeiffer Canyon Bridge closure are open to the public.

# **SITUATION SUMMARY**

## **2017 Statewide Winter Storms**

### **Cal OES Inland Region**

**River Forecast – The following river is forecast to meet or exceed Flood stage:**

**Mariposa County:**

- Merced River at Pohono Bridge is forecast to exceed flood stage at 10.0 feet the morning of 06/01/17.
  - Western portion of North Pines Campground, located at the east end of Yosemite Valley between the confluence of the Merced River and Tenaya Creek, begins to flood. Water rises to the base of the swinging bridge downstream from Chapel Meadow.

**River Forecast - The following rivers are forecast to meet or exceed Monitor Stage:**

- Placer County: Truckee River at Truckee
- Alpine County: East Fork Carson River at Markleeville, West Fork Carson River at Woodfords

**Please see link for River Forecast Guidance - <http://www.cnrfc.noaa.gov/>**

### **Cal OES Southern Region**

**River Forecast - The following river is forecast to meet or exceed Flood stage:**

**Mono County:**

- West Walker River at US 395 Below Little Walker is forecast to exceed flood stage at 6.0 feet the morning of 06/03/17.
  - Potential Impacts: Some minor flooding of lowlands, pastures, and rural roads.

**Please see link for River Forecast Guidance - <http://www.cnrfc.noaa.gov/>**

# **WEATHER SYNOPSIS BY REGION**

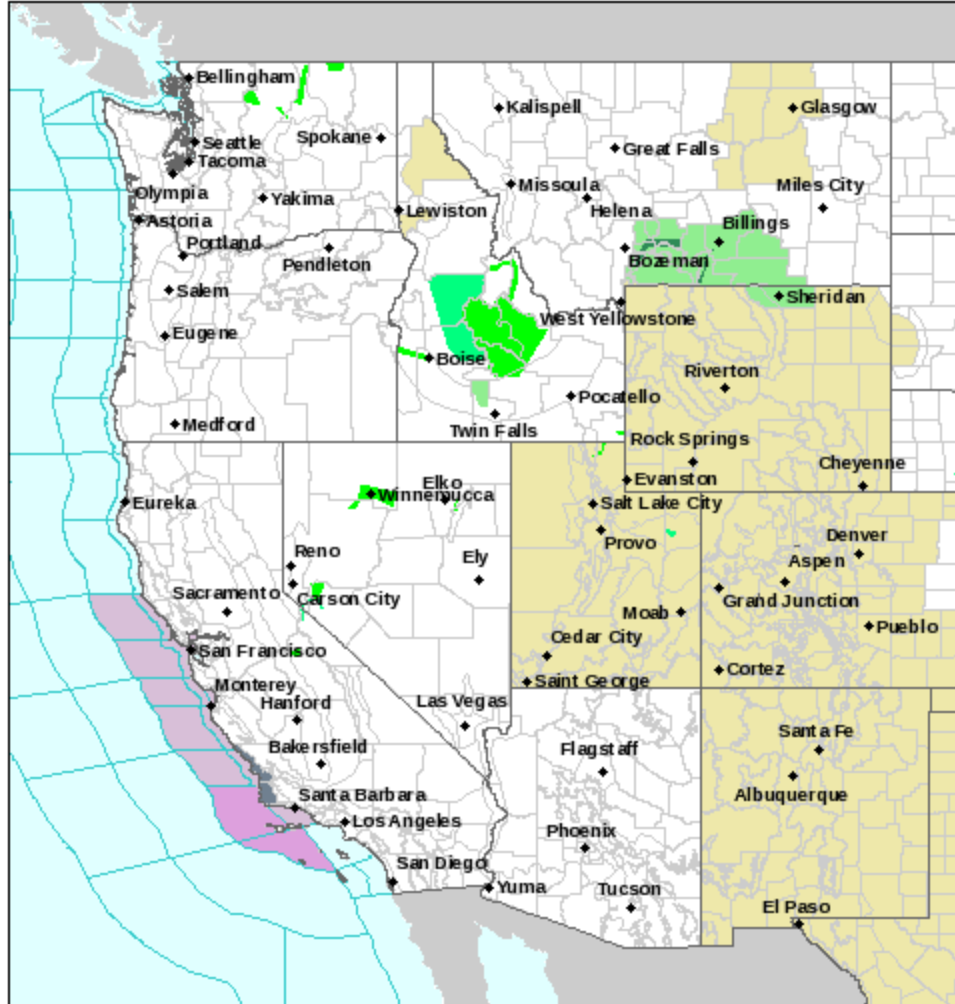

## **NORTHERN CALIFORNIA**

Some light rain has occurred from the trough passing through Northern California. This passing trough appears to be the beginning of a period of unsettled weather with a few weather systems expected to affect the region over the next 7-10 days. The main band of rain with this current system will move across the eastern half of the region, while the western half is pretty sunny. Some afternoon cloudiness is expected to return to the western areas and some light showers are also expected over the NW mountains. The eastern areas will clear somewhat, but also have lingering showers. Drier weather with some lingering mountain cloudiness will return today through Saturday afternoon. A chance of showers will develop Saturday evening/overnight in the north as another trough moves into the region. Stronger high pressure and warmer temperatures appear likely to return early next week and last through next Wednesday. A period of moderately strong westerly winds with gusts up around 35 mph is expected over the weekend that will then become northerly for Monday and weaken next Tuesday. Temperatures will vary from near to about 8 degrees above normal in many areas through early next week.

## **SOUTHERN CALIFORNIA**

A deeper marine layer, isolated showers and thunderstorms are expected along the Sierra Crest. A ridge will build over the area late in the week, leading to warmer temperatures today through Saturday. Highs will climb into the lower to mid 90s in the valleys by Friday and Saturday with minimum RH falling into the teens each afternoon. Winds should be light across all areas. A return of onshore flow should lead to slightly cooler weather Sunday and Monday.
